SUCCESSFUL PIANO STUDENTS

Following are the results of Miss Brown's pupils who passed the Toronto Conservatory examinations held in her studio under the supervision of Mr. Oliver, of the Conservatory staff:

Elementary theory—Stanley Hartley, first-class honors.

Primary piano—Winnifred Hardy, honors.

Primary piano—Norman Miller, pass.

Elementary piano—Annie Gaskell, pass.

Introductory piano—Velma North, Alice Hamilton, Violet Rae, with honors.

Introductory pass—Edna Christophers, Joe Morency.

One hundred per cent of Miss Brown's pupils were successful.

GAME SEASONS

The season for the hunting of ducks and geese will open next Monday, September 15th, and continue to December 14. The season for prairie chickens, partridge, etc., opens on October 1st and is for that month only. Hungarian partridge can be shot south of the Battle River from September 15th to November 15th, but there is no open season north of the Battle River for this game bird. The bag limit on ducks is 30 per day, 200 the season, and on geese 15 per day, 150 the season. The bag limit on prairie chickens, etc., is 10 per day, 15 the season.

GOLF

The Fernie ladies, twenty strong, will arrive Saturday morning at 10 o'clock. All the Blairmore members who are playing are asked to be ready to play off at 10.30. A club tea will be served at 4.30.

CANADIAN MINING INSTITUTE TO BE BANQUETED HERE

A special meeting of the executive of the Blairmore Board of Trade was held at the office of the Crows' Nest Pass Motors on Friday evening last, for the purpose of considering a proposal to entertain the approaching convention of the Canadian Institute of Mining and Metallurgy.

The Board was unanimous in support of the proposition and will tender a banquet at noon on the opening day of the convention, October 16th.

At the regular meeting of the town council on Monday night, the council decided to go in with the Board of Trade, making the affair a joint Board of Trade and Civic welcome.

The banquet will be held at 1 o'clock at the Cosmopolitan Hotel, or in the event of the hotel not having sufficient accommodation, then probably at the Opera House.

It was decided to issue complimentary tickets to the victors—75 to 100—and to sell tickets at \$2.00 each to members of the Board of Trade and others attending the banquet. It is expected that at least 150 will attend the banquet and each local guest will be responsible for one visitor.

We understand that the various coal companies will provide a banquet and smoker on the following two evenings, at which some local musical artists will assist in the programme.

On Saturday, the 18th, the members of the Institute will be taken by special train to Kimberley B.C., returning to Blairmore the same evening. Mr. Johnson, local mine inspector, is general secretary for the convention arrangements and is a busy man.

Similar conventions have been held during the past five or six years at Montreal, Vancouver, Toronto, Estevan and Winnipeg, and it is rather fortunate that Blairmore should secure the sixth convention.

COUNCIL WILL CO-OPERATE WITH BOARD OF TRADE

The regular meeting of The Town Council on Monday night was attended by Mayor A. McLeod, Councillors J. E. Gillis, J. A. McDonald, W. Patterson, Evan Morgan, A. E. Ferguson and J. Montalbetti, and Secretary Wright.

The minutes of last regular meeting were, on motion, approved as read and the following accounts were passed for payment, subject to approval by committees: West Canadian Collieries, for electric current supply for month of August, \$394.24; L. Malara \$4.00; C. H. Eriksen, for fence along Victoria street retaining wall, \$85.65; Department of Municipal Affairs, supplementary revenue tax, \$12.35; F. Bombardier \$8.00; A. Chula \$4.00; I. Rae \$4.00; D. McLennan \$4.00; B. Serandi \$10.00; S. Ennis \$80.00; J. Davis \$4.00; H. Benson \$8.00; J. Stafford \$20.00; G.W.V.A. \$25.00.

A letter from the secretary of the Blairmore Board of Trade, asking the co-operation of the Council in the matter of tendering a welcome banquet to the sixth annual convention of the Canadian Institute of Mining and Metallurgy, was supported by President L. L. Morgan, of the Board of Trade. The Council declared themselves quite unanimous in support of the Board's proposal.

A statement from the West Canadian Collieries re. waterworks and revenue and expenditure in connection with certain supplies in West Blairmore was received. After some consideration, the matter was left with the chairman of the waterworks department to be taken up with the company.

A suggestion was made that Mr. Forrie be asked to make a thorough survey of the water system and supply of the town, including the service in the extreme west end.

To an upright man, a good reputation is the greatest inheritance.

FALSE RUMOR CIRCULATED

Considerable discomfort was caused through the circulation last week end of a rumor to the effect that the Union Bank of Canada was failing and about to close its doors. For a few hours, quite a demand was made upon the bank for withdrawal of accounts. Upon investigation, however, it was found that there was absolutely no foundation to the rumor.

As a matter of fact, we are informed that the Union Bank never was in a stronger position than at the present time.

The Macleod annual school fair was held yesterday.

MOTOR TOURIST TRAFFIC

Remarkable increase in the motor tourist traffic to Alberta mountain resorts has been reported. The registration of cars entering the Rocky Mountain National Park is "double" that of the year previous. In the entire 1923 season 3100 passengers were registered at the camp while up to the end of July this year a total of 7557 passengers have been registered.

Rail traffic into the province has also been very heavy to both Jasper and Banff Parks.

The San Francisco Journal has been purchased by the new owners of The San Francisco Bulletin. The two papers have been merged.

Ask the Manager

There are many things the Manager of the Union Bank can help you with.

His daily contact with business problems enables him to give you competent advice. He will gladly do it.

One Source Of Fire

Danger of Spontaneous Combustion If Crops In Harvest When Damp

We know there are people who say, "The idea of spontaneous combustion. Their only idea is that fire can start only from a match or from lightning, and it is useless to talk about fire resulting when neither of these elements are present." Those who have believed that fire starts from such mysterious origin as spontaneous combustion, and that spontaneous combustion will result from wet or damp material will be careful in seeing that the crops are in fit condition before being gathered in.

In wet or catchy weather the farmer becomes anxious and in spite of his better judgment may yield to the temptation to put his crop in before it is really fit. Crop as housed should be saluted to minimize the danger from overheating. Better lose part of the crop through destruction by the wet and "catchy" weather than lose the whole crop and the loss of the crop through fire resulting from it being housed too soon. Part of our readers may still be skeptical but the wisest ones will take share in the warning. Nothing can be done with those who are too ignorant or too stupid to believe there is such a thing as spontaneous combustion.

A number of years ago we saw an ice-house, full of ice and packed in sawdust, was built on a wharf and accessible to a whole lake of water. It would be impossible to set fire to such a place by ordinary means, yet we saw the whole building consumed about noon on a hot summer day, when nobody was near to give it a start. Spontaneous combustion was the only theory by which the fire could be accounted for. From the Durham Chronicle.

EFFICIENCY IMPAIRED

Why Many Men and Women Are Badly Handicapped

When you are so run down by health that it impairs the efficiency of your work as well as your power to enjoy your leisure hours, or obtain rest, it is time you looked to the cause. If you do not, a serious nervous ailment is sure to result sooner or later. It is nearly all cases this condition, which doctors usually describe as general debility, is due to poor blood. Blood that is deficient in red corpuscles. When corpuscles are few, the blood is poor, and the system suffers. You lose appetite, have no energy, your nerves trouble you, and you are run down.

What you need is help to build up your blood and you should begin at once. The make your blood rich and red by taking Dr. Williams' Pink Pills. You will soon notice the difference in your strength, your appetite, and increased vigor. The reason is that the new blood created by Dr. Williams' Pink Pills stimulates the organs of the body to healthy activity, and the system gains nourishment. You are slowly or the well-behaved child of one egg, beating constantly, and continue until thick enough to spread. Add two tablespoons of grated apple, beat and spread on the cake.

You can get these pills from your druggist or by mail at 50 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

Canada's Production Of Butter and Cheese

Growing Importance of Dairy Industry

In Canada Shown By Figures

Canada turned out 165,458,759 pounds of creamy butter valued at \$56,991,008 last year, compared with 152,501,900 pounds valued at \$54,653,282 the year before. The year before butter in 1923 averaged 34 cents per pound against 35 cents per pound in 1922. Of last year's production, Quebec manufactured 60,179,616 pounds valued at \$20,741,454; Ontario, 54,778,150 pounds valued at \$19,643,095; and the Prairie Provinces, 52,119,574 pounds valued at \$22,522,521. Prairie provinces, 39,223,225 pounds valued at \$13,106,943; and British Columbia, 2,961,154 pounds valued at \$1,250,495.

Of cheese, Canada manufactured 11 per cent more at an increased value of 31 per cent last year compared with the year before. The total manufactures in 1923 being 141,483,353 pounds valued at \$20,741,454. The average price of cheese last year was 14 cents compared with 16c in 1922. The Maritime Provinces produced in 1923, 2,671,235 pounds of cheese valued at \$514,484; Quebec, 65,770,556 pounds valued at \$8,158,781; Ontario, 99,555,405 pounds valued at \$13,944,102; and the Prairie Provinces, 5,216,058 pounds valued at \$438,028.

It will be noticed Quebec manufactured the most creamy butter and Ontario by far the most cheese.

The city of Lima, Peru, has an earthquake about once a week, but in ten years there has been no loss of life or property. Slight jags and heavy rumblings are the chief characteristics.

In 1920 there were but 15,000 radio receivers in the country. Now there are 5,000,000, and with loudspeakers and extra head sets probably 10,000,000 people listen in every day.

The Apple Is A Most Attractive Fruit

British Columbia Apples Noted For Their Intense Color

The beautiful coloring of the B.C. apples makes them specially attractive. The cause of color is not thoroughly understood, but it may be said that each variety of apple has a color peculiar to itself and it only requires the proper conditions of growth and changes to develop them. It is well known that sunlight is an important factor in color development, helping to intensify the coloring of the apple. In warm dry seasons such as this has been on the Pacific coast from nature earlier than in wet seasons. Where the fruit is permitted to mature on the trees before it is harvested the higher and more beautiful the color will be.

British Columbia apples are noted for their intense color. In most districts the land is irrigated, and by stopping irrigation and causing a ripening of the tree the fruit more thoroughly matures and produces the rich, colors which make the fruit of B.C. notable.

There is a wide variety of ways in which apples may be prepared for the table and there is no lack of practical recipes which are suitable for any home or table in any part of the country.

Dutch Apple Cake.—Two cups flour, half teaspoonful salt, two teaspoonfuls baking powder, four tablespoonfuls butter, one cup milk, all well mixed, pour batter into greased baking dish, cover with sour apples peeled and sliced, sprinkle two tablespoonfuls sugar and one quarter teaspoonful cinnamon over them and bake in moderate oven about 35 minutes. Fill a baking dish three quarters full of sliced tart apples and sugar. This may be covered with pie crust, soft biscuit dough, or a batter of one cup sweet milk, one small teaspoonful salt, one egg, one teaspoonful soda, two teaspoonfuls cream of tartar, and flour to make a stiff batter.

Apple Catsup.—Quarter, core and pare 13 sour apples. Put in a saucepan, cover with water and let simmer until soft; nearly all of the water should be evaporated; rub through the sieve and add the following to each quart of pulp: One cup of sugar, one teaspoonful of cloves, one teaspoonful of nutmeg, two teaspoonfuls of cinnamon and one tablespoonful of salt; two cups of vinegar and two grated onions. Bring the catsup to a boil and let simmer gently for one hour. Bottle, cork and seal.

Apple Ice-cream.—One cup of sugar, one-third cup of water, one small spoonful of cream of tartar; heat gradually and boil without stirring until the syrup will thread when dropped from a fork. Pour slowly over the well-beaten white of one egg, beating constantly, and continue until thick enough to spread. Add two tablespoonfuls of grated apple, beat and spread on the cake.

Alberta Wheat Pool

Handled Over Thirty-Four Million Bushels of Wheat Last Year

Alberta's wheat pool, the first established in Canada, distributed \$37,720,716 in the initial year of operation, which closed July 15, according to an announcement made by the manager, Chester Elliott. The first and second payments totalled \$31,924,776, and the final payment amounted to \$5,795,940. The pool handled between 34,000,000 and 38,000,000 bushels of wheat, the exact figures are not yet obtained, and practically all this grain was of very high grade. The net return to local growers was about 86 cents a bushel.

Nights of Agony come in the train of asthma. The victim cannot lie down, and sleep is driven from his brain. What grateful relief is the immediate effect of Dr. J. D. Kellogg's Asthma Remedy. It banishes the frightful conditions, clears the passages, and enables the afflicted one to again sleep as soundly and restfully as a child. Insist on the genuine at your nearby druggist.

Welcomed By Radio

The 400 members of the British Association for the Advancement of Science and the International Mathematical Congress who have been travelling across Canada by Canadian National Railways, received their first welcome to Western Canada by radio as the two special trains neared Winnipeg.

In a special programme broadcast by CNRW, the National Railway Broadcasting station at Winnipeg, cordial greetings were extended to the distinguished visitors by Lieut. Governor Sir James Aikins and representatives of the sciences in Manitoba.

Other points visited by the party in addition to Winnipeg en route to Vancouver were Saskatoon, Edmonton and Jasper National Park.

The expression "boes' knees" and "ankles hips" may be heard with frequency among the Indians of today.

Saying Good-by To London

Queen Alexandra Plans to Visit Metropolis For Last Time

In October the Queen-Mother Alexandra will leave Southampton for her last visit to London. For years now—ever since the death of King Edward—she has lived at Sandringham, her country home, with which are associated the happiest memories of her life. But she has paid periodic visits to Marlborough House, her palace in London, every year. Now, at eighty, she feels the time has come to retire from the rush and whirl of the great metropolis. Yet she must say good-by to London—the London to which she came more than sixty years ago, the "sea-king's daughter from over the sea," to be the bride of the heir to the British throne.

"I want to have a last look at my dear London," she is reported to have said; and the forthcoming October visit is to afford her that opportunity.

There is none other London loves quite so well. It was London that took her to its heart when she came in all her shy loveliness from her Danish home. She won the hearts of the London, public then, and she has held her place secure ever since. Affection has long since deepened into loving devotion, tinged with veneration since she has grown old. There is no day the Londoners honor with more sentiment than Alexandra Day, when thousands sell roses—her favorite flower—to swell the fund for the Alexandra Hospital. And when Alexandra drives alone through London's streets—through the dingy East End as well as through dignified Belgravia—there is none, not even the most determined opponent of monarchy, who does not bow his head to her as she goes.

Nearly all children are subject to worms, and the parents who do not know this, spare them suffering by using Mother Graves' Worm Exterminator, an excellent remedy.

Automobile tourists in Southern California are warned not to yield to the lure of the beautiful white yucca blooms of the desert, either on private or public lands. The yucca is protected by law from extermination.

In the fiscal year ended March 31st, Canada exported 557,000 bushels of wheat, or 42,000,000 more than in the previous year. The value of wheat shipped abroad this year amounted to \$266,000,000.

SUNDAY SCHOOL LESSON

SEPTEMBER 14

JESUS DRIVEN FROM NAZARETH

Golden Text: He anointed me to preach good tidings. Luke 4:18.

Lesson: Luke 4:16-30.

Devotional Reading: Isaiah 61:1-2, 10, 11.

The Text Explained and Illumined

The Mission of Christ, verses 16-21. Jesus came to Nazareth, where he had been brought up and where he had lived from the age of thirty, and on the Sabbath he entered the synagogue, as his custom was. He had been trained by his parents from the age of four to attend the synagogue services, and now that he had come back inspired for his unique work, he continued to frequent the place of worship. "Cuz-jus" is the fifth element in the universe, says a Syrian proverb. "Habit is ten times nature," said the Duke of Wellington. "Habit is a boy's complaint about the rigidity of parental insistence upon church attendance, and a man's curse of home life."

During the habit-forming years of life, Bishop Vincent was wont to affirm that a man's life is a series of habits and revelation of God that his fellow worshippers. The rites were simple and archaic, but the conservatism of his custom still to join in the old habits and to keep up the practices of public service. "It is more significant than we sometimes realize. It is a reminder of the truth which we are apt to forget—the holiest personal life can scarcely afford to dispense with the regular public worship of the Church, for all its local imperfections and limitations, and divine provision for sustaining the individual soul. We cannot afford to be wiser than our Lord in the matter. If any one could have played that his spiritual experience was so lofty that it did not require the stimulus of public worship, if any one might have felt that the conservatism and communion of his personal life were sufficient from what ordinary mortals needed, it was I, was I."

But He made no such plea. Sabbath after Sabbath he came to the place of worship, side by side with God's average people, not for the mere sake of setting a good example, but for the deeper reasons of fellowship with God and man (James Moffat).

Automobile tourists in Southern California are warned not to yield to the lure of the beautiful white yucca blooms of the desert, either on private or public lands. The yucca is protected by law from extermination.

In the fiscal year ended March 31st, Canada exported 557,000 bushels of wheat, or 42,000,000 more than in the previous year. The value of wheat shipped abroad this year amounted to \$266,000,000.

Powers Of Death Ray

Matthews Says He Will Give Invention To Britain

"Once the 'death ray' is perfected, it would bring down a fleet of attacking aeroplanes in a charred and twisted mass of wreckage. If Grinnell Matthews, inventor of the supposedly death dealing device, said in New York as he sailed for England.

It will require eighteen months' work and \$250,000 expense to perfect the ray beyond its present limitation of 64 feet, the inventor said.

Matthews said that since coming to the United States, he had been offered a big price for his invention by another foreign government, but would stick to his determination to give it to the British Government.

"The British Isles are no longer islands, with the development of aeroplanes," he said. "It is my purpose to perfect a defense in the death ray."

A Power of Its Own.—Dr. Thomas' Electric Oil has a subtle power of its own. All who have heard it know this and keep it by them as the most valuable household article. Its uses are innumerable and for every year it has been prized as the leading liniment for man and beast.

When the herring fishing proved a comparative failure in the Shetland Islands, the women turned to making hand-knit woolen goods which sell readily for high prices.

In the latest annual report of the Uganda Railway is the quaint entry: "Two native passengers killed by wild animals."

"Fellowship Inn," to be established at Beilshingham, England, will be an experiment in a combined community centre and bar.

Among the countries of the world Canada stands first in the percentage of its population living in electrically lighted homes.

Automobile tourists in Southern California are warned not to yield to the lure of the beautiful white yucca blooms of the desert, either on private or public lands. The yucca is protected by law from extermination.

In the fiscal year ended March 31st, Canada exported 557,000 bushels of wheat, or 42,000,000 more than in the previous year. The value of wheat shipped abroad this year amounted to \$266,000,000.

WHEN ATTACKED BY DYSENTERY You Should Take

Thin People Live Longest

Thin people live long. This was an interesting disclosure at the annual picnic of the Three-Quarter Centennial Club, Battle Creek's unique organization of those who have reached 75 or more, of which Fred Laffera, aged 94, was the oldest. In the entire assemblage not a fat person was to be found.

Why suffer from corns when they can be painlessly rooted out by using Holloway's Corn Remover.

When first known to the ancient Romans, alkali was so expensive that it was sold weight for weight with gold.

For Corns and Warts—Mildred's Liniment

THE INEVITABILITY OF PUNISHMENT

Every one respects the view of gravity. It is inevitable. Rich or poor, good or bad, we know that if we fall off a high building we will be killed. So we take precautions not to fall. To exactly the extent that punishment for crimes becomes inevitable crime will be discouraged. To exactly the extent that such punishment is capable of being evaded, or is likely to be modified and made less unpleasant, crime will be encouraged. Let the sentimentalist think that over while they wait for crime to strike into their own lives.—Chicago Tribune.

ADVERTISING CANADA

In his address before the Associated Advertising Clubs of the World, President Beatty, of the Canadian Pacific Railway, told what advertising had done to make Canada known, and thus built it up and developed it, from the earliest times when the French Jesuit missionaries acted as advertisers for the "New World."

Mr. Beatty's selection to speak on this subject was a wise one, for the company over which he presides has spent \$67,000,000 since 1881 in advertising for colonists for Canada, while the Federal Government has spent \$35,000,000.

"The allusion to Kipling's famous poem, 'Our Lady of the Snows' called attention to the wide-spread idea that Canada has a year-long winter. And we believe that many people in other lands do not believe that grapes and peaches ripen in the central parts, while in Victoria, B.C., winter is almost unknown."

Mr. Beatty is a thorough believer in advertising Canada, and at once saw the value to the Dominion of "Municipal Canada," which we are bringing out with the idea of showing what Canada really is—not only a land of forests and farms, but of cities and towns with all the necessities for enjoying life, and with facilities for education.

As soon as the project was laid before Mr. Beatty, he seized the idea, and asked what he could do to aid it. Not only are we proud to have a signed article by Mr. Beatty, but pleased at the practical support which comes with it.

We naturally feel proud that one who immediately recognized the value of "Municipal Canada" should have been selected as representing the business side of Canadian progress and development.—Municipal Review.

PREDICTS "BEARDED WOMEN"

ATLANTIC CITY, N. J., Sept. 8.—Bobbed hair, if continued for several generations, will evolve a race of bearded women, according to Charles Nettle, of New York, vice president of the Wholesale Beauty Trade association's convention, which opened here today.

"Bobbed hair today, bearded women tomorrow," said Mr. Nettle. "The great-granddaughters of the bobbed beauties of the present will be able to twist jaunty mustaches and trim their beards à la Van Dyke. Bobbeds will become as common among them as among men. In every human being is a chemical laboratory that is constantly manufacturing hair. If the hair is not permitted to grow on the head it will grow on the face and body. Savage men who never cut their hair have moustache beards. Men of races that have cut their hair regularly at the barber's are hairy chested and hairy limbed."

BAG LIMITS AND SHOOTING REGULATIONS

Next to observation of the shooting seasons themselves the most important factor giving all hunters an equal chance to take game, and for giving all game a fair chance, is the observation of the bag limit and of certain simple shooting restrictions. Following the Migratory Bird Treaty such restrictions have been provided throughout Canada and the United States, and thus the hunters of both countries are given equal privileges while the game stock is conserved as well.

Bag Limits

Manitoba—Ducks: 20 before October 1st, 40 after, and not more than 200 of all kinds in a season; geese 10; brant 15; rails 25; Wilson snipe 25.

Saskatchewan—Ducks, geese and brant: 30 of all kinds in one day and not more than 200 of all kinds in a season; rails 25; black-bellied and golden plover, greater and lesser yellow-legs 15 of all kinds; Wilson snipe 25.

Alberta—Ducks: 30 in one day and not more than 200 of all kinds in a season; geese 15; brant 15; rails 25; black-bellied and golden plover, greater and lesser yellow-legs 15 of all kinds; Wilson snipe 25.

Shooting Restrictions

The use of automatic, swing or machine guns, or battery, or any gun larger than number 10 gauge is prohibited, and the use of any aeroplane, power-boat, sail-boat or night light and shooting from any horse-drawn or motor vehicle is forbidden.

The shooting of migratory game birds earlier than one hour before sunrise or later than one hour after sunset is prohibited.

ODDFELLOWS' MARITIME HOME

One of the recently established Maritime institutions is the Maritime Oddfellows' Home, which is located at Pictou, Nova Scotia. The Norwood House property, picturesquely situated at the shore of Pictou harbor, was purchased about a year ago and is now the home of quite a family of elderly members of the order and children of deceased members.

The property has been a good deal improved, and in the near future further additions will be made to it, so that more ample accommodation may be available. No time was lost in putting the home in order for reception of guests. The purchase price was \$15,000, and the trustees of the home have already invested a considerable sum in the improvements that have been made to the buildings and grounds and for farming equipment the total investment now being nearly \$39,000.

The first annual report of the trustees has just been issued and shows that the good work in providing for old members of the order and the families of deceased brethren has been going on apace. The home has a future of great usefulness ahead of it, and Oddfellowship in this province is justly proud of its achievement, looking forward, as the secretary of the trustees remarks in his report, to still more satisfactory work and success in the future.—Halifax Herald.

AN ACHIEVEMENT

John E. Chapman, former editor, Youth's Companion, died recently. He never wrote a "sex novel," story or play; he never printed a hectic "triangle" yarn in the journal over which he presided; he never held up to public gaze either the erotic indulgence of "young roses," or the silly pranks of spoiled youth, as examples of "real American life."

In other words he was not a "realist"; he was not a writer of "best sellers"; he was not able to "hook life in the face." But he made happiness and innocent enjoyment for hundreds of thousands of young people, and many others, too. Perhaps this may be counted as much of an achievement as that of the cynics and so-called "mollifiers" who laugh at unpopularity.—Exchange.

THE PRINCE ON ADVERTISING

When the Prince of Wales addressed the International Advertising convention at Wembley, he began with a paradoxical statement: "Little as I know about the art of advertising."

As a matter of fact, the Prince is one of our cleverest present-day advertisers. Just now his business consists in selling himself to the British Empire and the British Empire to the world. He is getting away with it, too. He knows how to produce pleasing publicity copy that men and women of all nations read. What else is advertising?

The Knights of Pythias captured the silver cup presented to the best fraternal order float in the Labor Day parade at Fernie, with a very impressive presentation of the Knights welcoming a new member to their order.

On The Move

LIKE the "standing army" that "just stood," goods that remain on the shelf are expensive luxuries to any merchant.

ADVERTISING is the force that moves slow sellers from counter to customer. Every advertisement is a salesman of proven ability, reaching every class, creed and sex in the community.

The set-up of an Advertisement is as important as the dress of a salesman. In "The Enterprise" special attention is given to Advertising set-up. In our columns

"AN ADVERTISEMENT IS AN INVITATION"

WINTER WORK TO BE PROVIDED FOR UNEMPLOYED

Ottawa.—The unemployment conference called by the Federal Government was concluded with the adoption of a report embodying a number of recommendations for meeting conditions of unemployment throughout Canada. The report, which was drafted by a special committee, made the important recommendation that emergency relief should be granted when, after full and careful investigation, it was found to be necessary. The expense of such relief, it stated, should be borne by the Federal, Provincial and Municipal authorities on the basis of fifty per cent, by the municipalities and twenty-five per cent, each by the province and the Dominion.

Recommendations that all Federal, Provincial and Municipal Government works now under construction should be continued during the winter months and that all Federal and Provincial Government work provided for during the past season of Parliament and legislatures should be undertaken immediately and continued during the winter, were also contained in the report. It was also recommended that contemplated construction of public buildings by the Federal Government should be proceeded with at once.

The report of the committee met with comparatively little opposition, but an amendment introduced by John W. Bruce, Toronto, one of the Labor delegation, calling for regulation of immigration to correspond with available employment, was not approved without considerable discussion. Finally it was passed by the conference by a vote of 13 to 11.

Just before the conference adjourned Hon. James Murdoch, Minister of the Interior, promised his best efforts to see that the recommendations in the report were approved by the Government.

Alberta Schools May Need Assistance

Inspector Surveying Districts Where Crops Have Failed

Edmonton.—School inspectors are now making a survey for the Department of Education in the districts affected by crop failures this year, in order to ascertain what measure of assistance will be necessary to keep the schools in operation. Hon. Fern Baker, the Minister of Education, says that the Government's policy in this regard will be decided when the inspectors' reports have been made. It is practically certain that the Government will have to do something in the way of making loans or grants to a considerable number of school districts that would not otherwise be able to operate on account of financial conditions, but just to what extent is not yet known. The southwestern part of the province is particularly affected this year, according to Mr. Baker, whereas the special grants last year were mostly in the north, where a good many school districts are too small and sparsely settled to pay the upkeep of their schools.

Boy Scout Working Way Around World

Native of Denmark Started Long Journey on April 3

Regina.—Helmer Stub, a native of Denmark, and one of the residents of Egypt, was in the city recently on his way around the world.

In Finland he made a wager of \$1,000 that he could circle the globe, working his own way and making all the money for necessary expenses. The winner is to pay the money into the Boy Scout fund in Denmark.

A start on the long journey was made April 3, and the traveller expects to finish November 15, 1925. He is 24 years old and is his native land Mr. Stub is a scout master.

Tip To Railroad Prevented Hold-Up

Sheriffs Boarded Golden State Limited and Captured Bandits

Chicago.—A tip to Chicago, Rock Island and Pacific Railroad officials prevented a hold-up of the Golden State Limited, at Meade, Kansas. Deputy sheriffs boarded the train a few miles east of Meade, and fought three masked men and boarded the train at the latter stop.

In the shooting that followed, two of the deputies were wounded, one of the bandits was captured and the others escaped into the darkness.

Has Given Up Hope
Toronto.—Ontario has given up hope of being able to get Alberta coal in the coming winter.

Canada's Improved Financial Status Is Subject Of Comment

"The returns as to Canada's trade for the past 12 months," says the Yorkshire Post, the leading commercial paper in the north of England, "clearly depict the Canadian business situation as by no means unimpaired." Canada's reliance on the United States for certain goods manufactured there is gradually diminishing. Her exports to South Africa and New Zealand have substantially increased, but her sales to Australia have declined about \$3,000,000, while her business with Great Britain might have been better than it has been. Generally speaking, however, the result of Canada's endeavors to trade within the Empire has not been inconsiderable. It is probable that improved financial status of Canada will lead to even better business not only with Great Britain, but with the Empire generally.

British Milling Concern To Operate In West

Spillers Overseas, Limited, Now Actively Engaged In Grain and Milling Business

Calgary.—Spillers Overseas, Limited, the British milling company, has completed negotiations with the Alberta Pacific Grain Company, according to telegraphic information received from Montreal from Sir William Nicholas, head of Spillers' interests.

It is understood that this announcement means the acquiring by Spillers, Limited, of the controlling interest in the Alberta Pacific Grain Company. The administration is to remain the same, with John I. McFarland, now head of the Alberta Pacific, as managing director, and the present staff will be retained.

This arrangement completes negotiations carried on by Spillers during the last few months in connection with the announced intention made some time ago of investing \$2,500,000 in Western Canada. The company has already secured control of the Alberta Flour Mills, Limited, Calgary, with a daily capacity of 10,000 barrels, and is building a huge terminal elevator at Vancouver with a capacity of 2,000,000 bushels and at a cost of \$2,500,000.

The Alberta Pacific Grain Company owns and controls 283 elevators, two-thirds of which are situated in this province, and the remainder in Saskatchewan, with the exception of one or two in British Columbia.

Labor Government A Fixture In Britain

So Thinks Malcolm MacDonald, Son of the British Premier

Montreal.—There are no young Liberals being born in Great Britain today. Things have changed since the days of Gladstone and Sullivan, when every young Briton was either a "Liberal" or else a "Conservative." The babies of the future are destined to be either Conservatives or Laborites. This is the assertion of Malcolm MacDonald, son of Ramsay MacDonald, Prime Minister of Great Britain, interviewed in Montreal. "The present Labor Government is the beginning of a long Labor rule," Mr. MacDonald says. "Labor will do very well in the next election, but I don't think they will get a clear majority. It will be a struggle between the Conservatives and Laborites." The Liberals would not figure much, and he does not believe that Lloyd George will ever return to power.

The star in the Conservative firmament would be Winston Churchill, whom Mr. MacDonald believes will one day be Conservative leader.

Mr. MacDonald is in Canada as a member of the Oxford University debating team, which will engage in oratorical contests in Canada and United States.

Veteran Horseman Dead
Wheeling, W. Va.—Edward F. "Pop" Geers, of Memphis, Tenn., dean of American harness drivers, and known for many years as the "grand old man of the trotting turf," died in "the harness." The veteran horseman was fatally injured when his mare, Mijadi Girl, stumbled and fell during the first harness race at the West Virginia State Fair.

Church Has Laurent's Bell
Port Salem, Donegal.—The bell of the steamship Laurent, which was wrecked near Lough Swilly in 1917, has been salvaged and presented to the parish church here, which has dedicated it for use.

Cannot Sell Alcoholic Extracts
Edmonton.—In the entire province of Alberta, including cities and towns as well as the Indian country, the sale of alcoholic extracts and essences by any merchant or agent will henceforth be illegal.

Son of Britain's Premier

MALCOLM MACDONALD, son of the British Premier, who is a member of the British university debating team which will compete against Canadian and United States university debaters.

VARYING YIELDS ARE INDICATED IN CROP REPORTS

Ottawa.—Reports of crop conditions in the prairie provinces on August 31, compiled by the Bureau of Statistics, indicate greatly varying wheat yields in different territories. From Manitoba, Manitoba, cutting of wheat is reported as complete, and threshing general. "Cereals yields are better than for several years, some fields of Marquis wheat yielding 40 bushels," it is reported. The Manitoba Department of Agriculture reports wheat two-fifths cut in Southern Manitoba on September 1, and cutting just beginning in the north. "Rye and barley cutting well advanced; frost damage small, and hail loss slight; rust damage negligible in Manitoba, but some loss in places." Brandon reports estimate the yield at 18 bushels.

Reports from Saskatchewan on August 25 are encouraging. The best crops are in the southern part of the province, it is reported, but a marked improvement is apparent in the east, central and northern districts. Wheat cutting general about the end of the month. From Swift Current yields are estimated at from 10 to 30 bushels an acre.

Harvesting is proceeding in Alberta under varied conditions. At the end of the month the cutting in the southern section of the province was from 15 to 25 per cent. complete. In the southern areas late rains have improved the grain crops somewhat, and warm weather has aided the milling process to such an extent that yields in some districts will be larger than anticipated.

Notwithstanding the late rains, however, there is a very large area in Southeastern Alberta where the yields will be very light. It is reported much of the grain in these sections will be cut with headers. This process is now going on, being hampered in some sections by heavy growth of weeds, which developed as a result of the late rains. The experimental farm at Lethbridge reports that the general rains in August greatly improved the feed situation at the end of July. Yield of late seeded crops grains will be materially improved, but the effect on wheat, beyond better filling, will not be much.

Ontario Prohibition Issue

Toronto, Ont.—The prohibition issue will be before the people of Ontario on October 23. On that date the electors of this province will express their opinions on questions intended to guide the Government as to the continuance of the Ontario Temperance Act or some other form of legislation relative to the sale of intoxicants. Political observers look for one of the most strenuously conducted plebiscite elections in the history of this part of Canada.

The change brings the central control of the largest self-contained grain handling firm in the world to Regina. The department of the company are now operated at Regina, Winnipeg, Port Arthur, New York and Vancouver, all administered from the head office in this city.

Allied Powers to Protect Foreigners In China

Washington.—Word of action by representatives of the United States, Great Britain and France, to assure protection of foreign lives and property in the civil war zone about Shanghai, was received from American Charge d'Affaires Bell. They have asked that a declaration of neutrality be issued covering the whole Yangtze River and its mouth. American citizens in the war zone are not in immediate danger, according to Consul-General Cunningham. Bell informed the Chinese foreign minister at Peking that the whole Yangtze River from Woosung is practically one vast harbor, containing ships of every nationality, and that a naval battle in the greatest harbor in the East could not be tolerated.

Interview Premier Dunning

Moderators of Saskatchewan Present Views On Liquor Laws

Regina, Sask.—Answering a delegation from the Moderation League of Saskatchewan, which waited on Premier Dunning and members of his cabinet and which presented the league's desires in the way of liquor legislation, the Premier said:

"Do not believe any rumors you may hear as to legislation under consideration. The first statement will be made from the floor of the house."

The league's formal statement declared that body to be in favor of: "The establishment of government liquor stores, or agencies in the cities, towns and villages of the province for the sale of spirituous and malt liquors in sealed packages."

"The retail sale of beer to be continued on the present basis, but the latter sum \$1,600,000 or 66 2/3 per cent, had been paid back. The liquidators proposed next to deal with the obligation of \$1,200,000 to the Ontario Government, which is a preferred depositor under the law."

The national committee of Home Bank depositors, which has not met since Parliament laid over until next session the claim for compensation, has been called to a conference in this city on October 1.

Absorbs Subsidiaries

Saskatchewan Co-operative Elevator Co. Becomes Largest Grain Handling Firm In World

Regina.—The amalgamation of all subsidiary companies of the Saskatchewan Co-operative Elevator Company under the name of the parent organization is announced here.

Up to now the Saskatchewan Co-operative Terminals, Ltd., the James Street Grain Corporation of New York and the James Stewart Grain Company, Ltd., Winnipeg, were operated as separate units. Under the reorganization scheme these will be operated as departments of the parent firm.

The change brings the central control of the largest self-contained grain handling firm in the world to Regina. The department of the company are now operated at Regina, Winnipeg, Port Arthur, New York and Vancouver, all administered from the head office in this city.

Collect Customs Duty At St. Paul Yards

New Arrangement With U.S. Importers To Cattle Shippers

Winnipeg.—The future customs duty on cattle being exported from Canada to the United States via Winnipeg, will be collected at South St. Paul stock yards, and not at Emerson near Winnipeg stock yard weights, as heretofore. This very important announcement was made by O. Freer and W. J. MacGowan, of the American Live Stock Exchange, on their return from St. Paul, where they were in conference with United States customs officials, Bureau of animal industry representatives and local stock yard men, who have been in communication with Washington on the subject.

Mr. MacGowan, President of the Winnipeg stock and feeder show, calls this arrangement an "being of the greatest value to Western Canada farmers, as it will mean, he stated, the reception in the States from Canada of cattle of a much more perfect physical fitness than under the old regulations."

Home Bank Claims

Conference of Depositors to Be Held In Toronto, Ont. Oct. 1st

Toronto.—I. E. Weldon, Joint Liquidator with G. T. Clarkson of the Home Bank, stated that good progress was being made in meeting preferred claims against the bank's assets. He said that out of \$1,700,000 notes of the bank, \$1,600,000 had been paid, and the others would be dealt with as they appeared.

In order to pay the dividend of 25 per cent. to depositors, a total of \$2,700,000 had been required, of which \$2,400,000 had been borrowed from other banks, but of the latter sum \$1,600,000 or 66 2/3 per cent, had been paid back. The liquidators proposed next to deal with the obligation of \$1,200,000 to the Ontario Government, which is a preferred depositor under the law."

The national committee of Home Bank depositors, which has not met since Parliament laid over until next session the claim for compensation, has been called to a conference in this city on October 1.

The change brings the central control of the largest self-contained grain handling firm in the world to Regina. The department of the company are now operated at Regina, Winnipeg, Port Arthur, New York and Vancouver, all administered from the head office in this city.

WORLD PEACE CAN COME ONLY BY ARBITRATION

Geneva.—The next disarmament conference must be held in Europe, not in Washington, Mr. MacDonald, the British Prime Minister, declared in explaining Great Britain's position on the great problems before the League assembly.

Mr. MacDonald expressed the conviction that any new conference, especially if it discussed reduction of land armaments, should be held in Europe, because it could best treat here conditions existing in Europe. The heads of the European states must attend such a conference if the conference hoped to accomplish anything authoritatively.

The conference would probably last several months, and the premiers must be free to come back and forth. "It held in Washington, it would be impossible for the premiers to spend sufficient time there."

The Prime Minister said there was no nation more interested in the reduction of armaments than the United States; but he did not participate in any new conference, it would be a source of tremendous disappointment to everybody.

Mr. MacDonald emphasized arbitration as the best means of assuring world peace. His Government was opposed to the proposed pact of guarantees, because Britain wanted to know what it was doing, and would not sign a blank cheque. He favored one arbitration tribunal able to deliver judgments which would make for peace, and declared that Britain believed that a pact of guarantees would smash the League and make for war.

Referring to the policy of pacts for mutual assistance, Mr. MacDonald feared they would nurture what he termed the mustard seed of militarism. Because the countries have not approved the pact of guarantees, the Premier went on, was no sign that everything was lost. The outlook was bright; the British Government would go to the limit in backing any feasible plan.

Says Canada Wants Navy
Quebec.—There is a growing sentiment in Canada in favor of Canadian participation in a scheme of naval defense, and practical expression will be given to this sentiment when Canada's overseas expedition assumes larger proportions. This was the opinion expressed by Vice-Admiral Sir Fredrick Field prior to the leave-taking of the British Special Service Squadron.

Australia Ratifies Wireless Expenditure

Provides For Erection Of Beam Station Costing \$120,000

Melbourne.—The House of Representatives ratified the bill which provides for the erection of a beam station in Australia to cost \$120,000. The station will operate on a wave length of one hundred metres.

Premier Bruce recently expressed the hope that the transatlantic cable by beam wireless service would be less than those chargeable under high power system.

Child Spent Night In Bush
Notman.—Waggoner shot a Perry Creek from where his parents were camping, the three-year-old daughter of Mr. and Mrs. D. Leith, of Weyliffe, spent night in the bush in spite of anxious search parties, and was found unharmed in the morning at 5 o'clock on the opposite bank of the creek two or three miles distant from the camp.

No Special Preparation For Prince
Toronto.—The manager of the "Princess of Wales" cruise of Albert V. L. Carlyle, was in the city Sept. 2, enroute to the west. No special preparations were being made, he said, for the Prince's visit to his ranch.

\$1.00 PER BUSHEL INITIAL PAYMENT FOR WHEAT POOLS

Winnipeg.—An advance payment of \$1 per bushel will be made on No. 1 Northern wheat delivered by members of the Manitoba and Saskatchewan wheat pools this season. It was announced here following a conference of representatives of the two pools.

On No. 2 Northern, 75 cents will be paid; on No. 3, 50 cents; and on other grades in proportion. All prices will be on the basis "in store" at Fort William.

Negotiations are in progress between the pools and representatives of the elevator interests for the handling of pool grain, and it is expected an agreement will be reached.

A general manager for the inter-provincial wheat pool selling agency will not be appointed for some time, it was learned at the close of a meeting of the special committee of the Central Selling Agency. It was stated that the executive desires to see how the pools work out on their early marketing, and how the present staff can handle the work with one year's experience gained in the Alberta pool. It was also learned that no member of the Winnipeg Grain Exchange or anyone indirectly connected with the exchange is being considered at the present time for the position.

Most of the time of the committee was taken up with a discussion on the handling of pool wheat through regular line elevators.

"That is a problem big enough for one committee to decide at this time of year," one member of the committee stated.

Says Ghandi Now Recognizes His Error

Considered To Be Friend Of British Rule In India

Vancouver, B.C.—No sane government at home would consider giving India Home Rule in view of the ignorance of the people and the manner in which the politicians work upon them, said F. A. Eastace, of the Public Works Department, British Columbia, India, who reached Vancouver on the Empress of Australia.

The habit of local governments of advancing destructive politics and radical views and of opposing the budget on practically every occasion is the direct cause of the present unrest and the feeling of insecurity everywhere in India, Mr. Eastace explained. Men like Ghandi have wisdom enough to see the error of their former policy, Mr. Eastace said further, and this man, who was once a dangerous radical is now a moderate and thought to be a staunch friend of British rule in India.

Diamond Robbery In Toronto

Mercants Lose Valuable Papers and \$15,000 Worth of Jewels

Toronto.—Assorted diamonds valued at \$15,000 were stolen from the office of R. Strauss and Sons, wholesale diamond merchants. The combination lock was apparently cut, but by means of a Mr. Eastace said further, and this man, who was once a dangerous radical is now a moderate and thought to be a staunch friend of British rule in India.

Local and General Items

The Coleman vendor store opened for business last week.

It is a more profitable proposition to like what you do than to do what you like.

Mr. and Mrs. Frank Flett, of Cardston, were visitors here during the week.

The editor is this week away honeymooning, and the devils are all at large.

The Lethbridge city council spent \$93.00 in entertainment of the visiting Corinthians.

J. P. O'Neil will arrive Saturday morning from a visit to his old home at North Augusta, Ontario.

D. A. Howe received word on Wednesday that his wife and children had arrived safely at Liverpool, England.

Nowadays some editors possess automobiles. It is questionable, however, how they can ever get to own one.

Since our last issue, doctors in attendance upon Rev. Father Moriarty at Calgary have expressed hope for his recovery.

Messrs. Emil Trono and James Serra are due from Banff this week end to spend a few days with Mr. and Mrs. S. Trono here.

Rev. A. W. Neal will be leaving on September the 22nd for St. John's College, Winnipeg, and expects to be away until about May next.

Mr. and Mrs. Frank Flett stopped off in Blairmore Saturday evening, returning to Cardston from a motor trip to Cranbrook in company with Ross Synder.

Rev. Father Cosman went to Calgary on Sunday night on a visit to Father Moriarty, victim of a recent motor accident, who is a patient at the Holy Cross hospital.

Mr. John T. Sterling was down from Edmonton on Monday to assist in making final arrangements for the entertainment of the Sixth Annual Convention of the Canadian Institute of Mining and Metallurgy.

Mr. J. D. S. Barrett and little son Roland, left Coleman on Saturday evening last for Curling, Newfoundland, where we understand Mr. Barrett will engage with his brother, Mr. Andrew Barrett, on The Western Star. Mrs. Barrett and daughter will leave Coleman in a few weeks for the east.

A convention of Sunshine Trail delegates from several points in Montana and from Lethbridge and Calgary was held at Calgary last week, when a considerable number were present. This international highway now extends from Edmonton in the north to Butte, Montana, in the south.

About 30 Oddfellows motored from Michel on Tuesday evening to attend lodge with the local members. During the evening the Michel degree team exemplified the initiation degree. The Blairmore Oddfellows will likely make a return visit to Michel in the near future.

Mrs. Foster Brown, of Macleod, president of the Alberta Rebekah Assembly, is this week paying an official visit to the Pass Rebekah lodges. Tonight she will meet with the members of Crowview Rebekah Lodge in regular session and a large turnout of members is anticipated.

Many city and town councils throughout British Columbia are endorsing a resolution to be submitted to the Union of British Columbia Municipalities, asking for legislation to abolish school boards and police commissioners in municipalities with a population of less than 8000 and that their powers be transferred to municipal councils. The city of Fernie has endorsed the resolution.

Miss Jane Archer is down from Calgary for a few days.

Albert Joseph McKenzie, of Pincher Creek, has been appointed Process Server.

Grant Smith, of Pincher Creek, has been appointed manager of the Union Bank at Cowley.

Messrs. C. J. O'Neil and J. G. Billings, of Fernie, were business visitors here on Monday.

An addition is to be made to the Lethbridge brewery, to cost in the neighborhood of \$150,000.

Miss Brown will return about the 18th of September to resume her piano and theory classes.

J. R. Gresham returned the beginning of the week from a short holiday roving over the prairie.

A dance will be given in the Union hall at Hillcrest on Friday night. Mason's Melody Boys will furnish the music.

Messrs Howard Bush and A. Nutting, of Walkerton, Ontario, arrived Sunday morning on a visit to the former's father, Mr. W. M. Bush.

Two dozen men, located in C. P. R. box cars, when brought before the magistrate, were let out on suspended sentences on the charge of vagrancy.

On account of the rain, the tennis tournament being played on the West Blairmore courts, was interrupted and we are unable to publish final results but will do so next week, weather permitting.

Although it is only eighteen years ago that Alberta became a province, its population has increased four-fold, while the grain yield has increased twenty-fold. The total agricultural products of Alberta in 1923 were worth \$223,000,000.

At the regular convention of Livingstone Lodge, K. of P., tomorrow night, the third degree will be conferred on a class of candidates. A number of members from Coleman and Hillcrest will be present and will likely assist.

At a meeting of the clergymen of Coleman, Hillcrest, Bellevue and Blairmore, held at the Union church on Friday night last, plans were made for a monthly exchange of pulpits between the pastors of the various Methodist, Presbyterian and Union churches. An association was formed, with the following officers: President, Rev. W. T. Young; Vice-president, James Fairhurst, of Coleman; Secretary, J. Shevels, of Bellevue. The association is named "The Pass United Church Association," and its objects are to help bring into working fellowship the Methodist, Presbyterian and Union churches of The Pass.

Etiquette For Bridegrooms

When you stand before the altar Scared and waiting for the halter Don't let wild imagination throw your senses in a whirl;

You have not become a midge! Nor a giant; nor a fidget; No one's looking at you mister; they are looking at the girl.

When it's time for osculations It will please your wife's relations Should you miss her mouth and give your wife a peck upon the chin; When they tease about it later With much uttering and laughter Do not enter wild denials; take it all with sheepish grin.

As you walk some hundred paces Through a sea of upturned faces While the pastor like a barber glances round to see who's next. Try to have a pale complexion And a look of proud affection As your leaden feet go clumping by the wife you have annexed.

Constable Powell, A. P. P., has returned to duty after a brief holiday.

D. A. Howe was a visitor to Cowley on Tuesday.

James Brown, of Nanton, has recently been appointed a Justice of the Peace.

Miss E. M. Baker, of the local telephone staff, is holidaying at her home at Waterton Lakes.

Mr. Frank Wheatley returned last week end from Calgary, where he represented the local union at the miners' conference.

The partnership of E. F. Gare and J. D. S. Barrett in the Coleman Journal was dissolved on September 2nd. Mr. Gare now remains sole proprietor.

Mr. J. E. Clark, of "D" The Tailor's establishment, Lethbridge, has been in town the past three weeks, taking a course in cutting at the Upton Tailoring shop.

It has been estimated that Southern Alberta's sheep and wool industry this year will bring shepherds and farmers of the South new wealth to the extent of \$1,500,000.

Messrs. S. Trono and Ben Doraty have returned from an eight-days' trip by motor over the Banff-Windermere trail. They spent a few days at Banff, the guests of Mr. Trono's brothers, Louis and Emil, and returned via Calgary.

Albert Noga, who for some years has done a private watch repairing business in the Pass, has now opened up a repair shop in the store lately vacated by Alf. Link, the barber.

A change in the system of collecting income tax will soon take place. Under the new system, the collection of income taxes will be handed over to the customs. The Dominion will be divided into districts, and the collectors of customs at the different ports will be in charge. Extra clerks will no doubt be required to do the work.

W. M. Bush—East End

We have lately received a copy of "Unity," the first issue of a magazine got up by the Rev. W. T. Young, giving first hand information of the doings of the various branches of the Union Church here. We find it interesting reading and a periodical issue of the same sort should prove beneficial to the community.

"OCEANS OF POWER"

THE NEW OVERLAND 91 literally has "Oceans of Power!" The famous OVERLAND Engine as improved in the New 91 develops SEVEN HORSEPOWER MORE than former models, which will take you up and practically over any hill in the Blairmore district without a gear shift. This is only one of several important factors in the "New 91" that has made it "The Most Car in the World for the Money."

Call in and ask for a Demonstration—You will be convinced.
